## **Eyecom<sup>3</sup> EHR Receives 2011 / 2012 ONC-ATCB Certification**

*Drummond Group certifies Version  
4.51 as a Complete EHR Ambulatory for  
Meaningful Use*

**San Diego, CA** (July 28, 2011) Eyecom<sup>3</sup>, a division of **HealthLine Systems, Inc.** announced today that it has received the federal government's "meaningful use" stamp of approval by earning complete EHR Ambulatory certification. The designation officially deems the electronic health record (EHR) software capable of enabling providers to qualify for funding under the American Recovery and Reinvestment Act (ARRA). Tested and certified under the Drummond Group's Electronic Health Records Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB) program, the Eyecom<sup>3</sup> EHR software is 2011/2012 compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

"We are delighted to receive certification that validates that the Eyecom<sup>3</sup> EHR will provide eyecare professionals an opportunity to implement a fully electronic system to support their optometric practices. Eyecare providers can now leverage our software to not only make significant care improvements but to also achieve meaningful use and qualify for incentive funds under the ARRA. We are proud to offer eyecare professionals the opportunity to truly improve care in their communities," says Dan Littrell, **HealthLine Systems** Chief Executive Officer. "We are delighted to offer current and future clients a system that manages all aspects of their optometric practice."

Eyecom<sup>3</sup> is a browser-based, HIPAA compliance ready practice management software solution. Acknowledged as the industry leader in computerized recall and patient target marketing, Eyecom<sup>3</sup> controls practice costs and maximizes return-on-investment.

Drummond Group's ONC-ATCB 2011/2012 certification program tests and certifies that EHRs meet the meaningful use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the EHR systems of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology -- a key component of the federal government's push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. healthcare providers.

“The need to leverage information technology in the healthcare industry is huge – as the quality of care and efficiency benefits that come with computerization can really make a difference in the overall patient experience. We’re ready to help transform the industry by providing the sophisticated software testing services that ensure that vendors and hospitals are offering systems that are capable of meeting the meaningful use standards required to obtain incentive funds as well as the rich functionality required to move the clinical care needle forward,” says Rik Drummond, CEO of the Drummond Group.

*This Complete EHR is 2011/2012 compliant and has been certified by Drummond Group, an ONC-ATCB approved to certify any complete ambulatory, in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.* Eyecom<sup>3</sup> / **HealthLine Systems** was certified on July 28, 2011. Certification ID #07282011 - 1145 - 8, for Eyecom<sup>3</sup> EHR, version 4.51 as a Complete EHR Ambulatory. The Clinical Quality Measures tested were NQF0013, NQF0024, NQF0028, NQF0038, NQF0041, NQF0086, NQF0088, NQF0089, NQF0421. Additional software used in the certification included RelayHealth, Microsoft Excel and Email.

### **About Eyecom<sup>3</sup>/HealthLine Systems**

Eyecom<sup>3</sup> and **HealthLine Systems** client base represents over a thousand distinguished healthcare organizations and hundreds of optometric offices in 50 states, Canada and Mexico. Incorporated in 1985, **HealthLine** is privately held and based in San Diego, California. **HealthLine** is committed to provide peerless information management solutions to maximize the quality and delivery of healthcare services through technological innovation.
